

## Key Indicator Systems

NARA has had the pleasure of working with a number of states and provinces on Key Indicator Systems and Risk Assessments. Following are a few of those states:

**Georgia** – Included comprehensive validation of their core rule risk assessment system.

**Illinois** – Key Indicator System work is currently in process.

**Kansas** – Included the development of a straightforward and focused Key Indicator System.

**Province of Ontario** – Included a comprehensive review of both their risk assessment and key indicator systems; includes tiered licensing system.

**Washington** – Has the most established (longest running) Key Indicator System.
