

iLook Out for Child Abuse

An Online Learning Module and Research Study

What is iLook Out for Child Abuse

iLook Out for Child Abuse is an online learning module that uses interactive videos to help prepare Early Childhood Professionals to be responsible mandated reporters for suspected child abuse.

iLookOut explains how to fulfill your responsibilities to protect children, as well as recent changes to the law about mandated reporting.

To evaluate the effectiveness of *iLookOut*, there are brief pre- and post-module questionnaires you will be asked to complete.

In a randomized control trial *iLookOut* significantly improved knowledge about mandated reporting, and was very well received by childcare professionals.

- “As a childcare provider this opened my eyes a lot! This was an awesome child abuse training!”
- “I liked seeing the information play out in an actual classroom setting from day to day, and becoming familiar with the rules/regulations our state has on such matters [mandated reporting].”
- “I liked that it was interactive, not just a bunch of facts!”

Principle Researcher: Benjamin H. Levi, M.D., Ph.D.
