RESEARCH INSTITUTE FOR KEY INDICATORS LLC (RIKILLC)

RIKI – Research Institute for Key Indicators LLC, directed by Dr Richard Fiene, Research Psychologist and Retired Professor of Psychology and Human Development, Penn State University, focuses on improving the quality of early care and education programs nationally and internationally through an empirically based Key Indicator methodology (*the Early Childhood Program Quality Improvement and Indicator Model (ECPQI2M)*).

In 2013, Dr Fiene created **RIKI – Research Institute for Key Indicators LLC** in order to consolidate all research development on human services regulatory compliance key indicators into a single research institute. All of Dr Fiene’s previous research on *ECPQI2M* became part of the new institute specifically designed to further develop his human service licensing and program monitoring methodologies and systems.

In 2015, **RIKI and NARA (National Association for Regulatory Administration)** entered into an exclusive partnership for the future development and implementation of differential monitoring, risk assessment and key indicators.
