

The Four States of Space

Four States of Space	<i>Motion (Velocity)</i>	<i>Stationary</i>
<i>Filled (Mass)</i>	Momentum	Object Permanence
<i>Empty</i>	Time	Singularity

Object Permanence --> Momentum = Acceleration.

Filled Space x Empty Space = Gravity.

Object Permanence x Singularity = Black Hole.

Singularity --> Time = Big Bounce.

Object Permanence --> Time = Random to Linear.

Momentum --> Singularity = Mass + Energy to Dark Matter + Energy
